"A recent study published in 'Environment International' by scientists from the Vrije Universiteit Amsterdam has found plastic particles in human blood. Analysing blood samples from 22 anonymized, healthy adult donors from the general public, they found it in 17 among them". By www.oceancare.org

**A zero-waste
seaweed-based
bio-packaging solution
that is fully sustainable,
100% biodegradable &
compostable**

ABOUT COMPANY

Nature has provided a real,
scalable and affordable
solution in **SEAWEED**
Abundant & easy to cultivate
No deforestation
Sequester CO2

We incorporate triple bottom line
approach in our business. Our business
is beyond a solution for plastic waste
problem.

“To be a true biopackaging manufacturer
and the leader in the circular packaging
story that can extend across packaging
variant formats.”

CEO STATEMENT

Dr. Noryawati M, S.Si

We are the last generation
who still have a very short
time to stop plastic waste
polluting our body.

OUR IMPACT

WE ARE ALIGNED WITH SDGs

Social

Environmental

Economic

VISION & MISSION

THERE IS ONLY ONE
EARTH, WE MUST
WORK TOGETHER TO
PROTECT HER.

Vision: To be the leader in the circular packaging story that can extend across packaging variant formats.

Mission: Manufacture seaweed-based biopackaging to tackle single use plastic waste pollution without sacrificing consumers' convenience.

PRODUCTS & APPLICATIONS

Our products are very reliable for food packaging, cutlery, hotels & resorts, personal care, retailers, and pet lovers.
